

THE THOUGHT BEHIND THE PROJECT

Various Ideas of Teammates:

Chaitanya Satoke

Studying real-world cyberattacks and data breaches.

Identifying and testing web application vulnerabilities.

Sneh Nagpure

Performing Nessus scans to analyze security flaws.

Atharva Shete

Exploring SOC, SIEM, and Threat Intelligence platforms.

Ayush Yerpude

Investigating cybersecurity challenges in educational institutions.

FEATURES

Threat Analysis :

Identifying Key cyber threats and their attack vector

Security Testing:

Conducting manual and automated vulnerability assessment

Security Operations:

Studying SOC, SIEM, and incident response methodologies

Future tech security:

Analyzing IoT, cloud, AI and their security concern

PRIORITY CHART:
